

IES SCOPE

Seamless communication from Purchase Order to Customs

Your clients want to know exactly where their freight is at all times. Clients need you to provide visibility in a way they can understand. Where is my PO and when will I receive it? Most have little appreciation for the complexities of the Supply Chain or the number of coordinated events that must occur to get them their freight on time.

SCOPE delivers the service and the security you require. SCOPE collaborating with all relevant parties is fundamental to facilitate the transfer of critical information. SCOPE is a common collaborative application and data repository allowing different systems to communicate as a highly integrated unit.

Here's an example of how SCOPE delivers:

- An CONSIGEE/BUYER enters or transmits via EDI a Purchase Order into SCOPE ①
- The SHIPPER/SUPPLIER acknowledges the receipt of the PO's and creates a Shipping Order and Commercial Invoice ②
- The EXPORT FORWARDER receives the Shipping Order and creates a booking with the Carrier, transmits AMS to US Customs and completes the Bill of Lading process ③
- The CARRIER updates the progress of the entire shipment via EDI 315 Status Messages or via FSU and FSA messages from the Airlines. The freight process is updated and communicated to all supply chain participants in real-time ④
- The IMPORT FORWARDER/CHB receives the Data into their system for processing reducing errors. Cutting costs and eliminating key strokes. Updated milestones on Customs Clearance and Delivery Order information are updated as it happens ⑤
- Complete Supply Chain Management information related to each party's shipments are visible and actionable on the web
- Automatic Triggers fire only on user-defined events
- Security of all parties is observed as is relevant to them

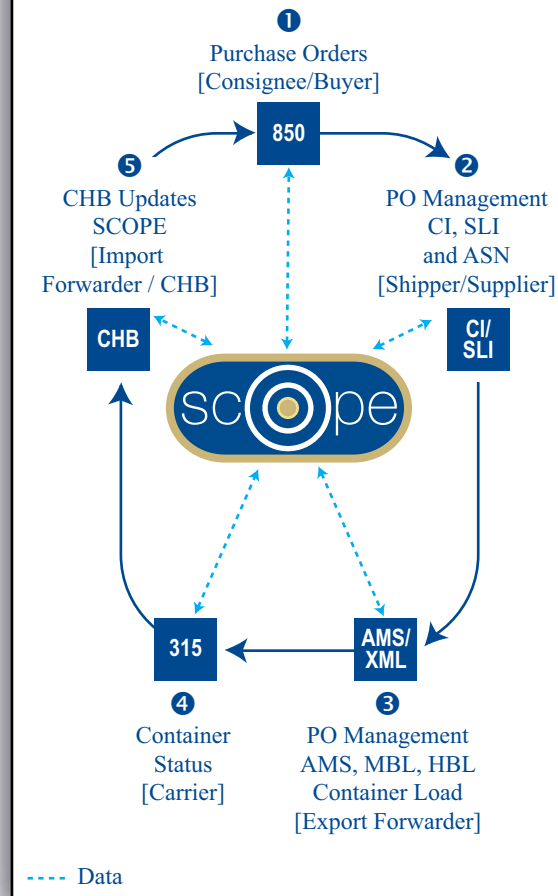

Review the IES process and realize competitive advantage. SCOPE is designed by, and specifically for our customers' unique needs. SCOPE is the only solution that simplifies the complex business of importing and exporting goods into and out of the United States.

Let IES and SCOPE make the difference it takes to grow and optimize your business.
